

# VIP Premium Platform

Billions of data points are cleanly displayed to allow for a comprehensive diagnosis of your shipping profile. Conveniently view your Parcel Audit credits and/or Contract Engineering savings details and Key Performance Indicators (KPIs) to identify shipping trends over time, new savings opportunities, and areas for optimizing operational changes.

## SHIPPING CHARGES KPI

The Shipping Charges KPI provides actionable insights into your parcel spend and where your costs have been applied on your carrier invoices.

## PREMIUM KPIS

Quickly determine the health of your parcel shipping by monitoring your average cost/package, cost/lb, and zone, along with your overall package volume - all of which can be filtered by carrier, timeframe, account, and shipping mode.

## PARCEL INVOICE-BASED REPORTING

Robust set of standard reports including invoice detail, package detail, and audit results reporting.

## CARRIER INVOICE SUMMARIES

Carrier invoice summaries allow you to review your high-level shipping costs at a glance and easily click through to the charge-level details to investigate any potential issues in your spending.

## PREMIUM REPORTING

Ready-to-run report templates providing additional savings opportunities and advanced analytics on your shipping trends including (but not limited to): air to ground optimization, zone breakdown, average cost analytics, and surcharge insights.

## GL CODING

Set up rules for your parcel shipments so that cost center allocation can be done automatically and save your staff valuable time.

## PACKAGE-LEVEL ALERTS

Once you understand the charges that cost you the most, you will be notified whenever a package fits into a specific threshold or when a charge of that type occurs for a particular account or service type.
